LANCASHIRE RESOURCES
GROUP LIMITED

Lancashire Resources Group Limited works with a number of large organisations to source, import and distribute large volume of PPE and medical equipment. We have direct supply from manufacturers all over the world and have on the ground UK stock at all times.

All our products are fully certified and of the highest specification. Working direct with the manufacturers allows us to offer affordable solutions and price match on many products, including Covid-19 lateral flow kits, nitrile gloves, masks and sanitiser products.

LRG also works in partnership with Dr Adams Laboratories who is the sister company to a Hong Kong Public listed Pharmaceutical company, Sanai Health Industry Group Company Limited.

It was established to deliver analytical services and innovative instruments for pharmaceutical and biological laboratory sectors. This partnership allows us to import the latest innovative products on the market.

LRG was set up as a sole trader in March 2020 and grew to become a limited company in Oct 2020. We are continually growing and we are looking forward to moving into our new offices at Ribble Court on Shuttleworth Mead Business Park early 2021.

We pride ourselves on delivering a quality service to our clients which allows them to increase their customer base alongside providing them with affordable, quality and certified products.

working in partnership with

Dr Adams Laboratories

Company Overview

Dr. Adams is the sister company to a Hong Kong Public listed Pharmaceutical company, Sanai Health Industry Group Company Limited (HK Stock 1889). It was established to deliver analytical services and innovative instruments for pharmaceutical and biological laboratory sectors.

Our products diversify across four categories: Chemical analytical services, compliance audit services, Distribution of Bio-Analytical instruments and Safety Protective Equipment.

We hold the exclusive distribution right for Cambridge developed award winning Bio-analytical instruments, Speedybreedy, Seasure and Shepherds. Since the COVID pandemic, we have helped UK health sector and local authorities to source and manage the supply chain for COVID related protective products.

We are approved vendor for DHSC, Councils, Cromwell and many other reputable organisations.

Key Customers

Department of Health & Social Care
Cromwell Industrial Tools and Equipment
East Sussex County Council
Hammersmith & Fulham Council
Nottingham City Council
Nottinghamshire County Council
Thurrock Council
Vectura

Our Promise

All our products are sourced from high-quality production facilities, which are ISO9001 or ISO13485 accredited.

We ensure that all products have authentic independent certifications.

We have a compliance team who are qualified ensure that the products are compliant to Government standards.

We offer the complete package of all the products that any business needs.

Our compliance department can visit your premises to help ensuring that your premises are compliant with Covid-19 Government guidelines.

Friendly and personal support from sales to aftercare.

Polypak

Company Overview

We are a specialist supplier within the high volume commodity markets.

We have over 20 years experience working within the UK, EU and US markets.

Our customers include some of the largest brands in the world and we ensure that we only engage with manufacturers who meet the strictest quality and ethical standards.

Our core products sit within the Global amenities markets where our annual supply is in excess of 400 million units. We have adapted our own manufacturing and signed supply agreement partnerships within several other areas which is why we can now increase our PPE lines.

All production runs are in line with international AQL standards and all customers are supplied with independent production inspection documents that support this.

All of our customers are supplied with full factory audit documents to ensure the highest ethical standards are met.

Sanitiser Manufacturer

- Production capacity of 100 million units per day
- CE, EPA, GMP, GMP, ISO 9001, and ISO 14001 certified factory
- 700,000m2 production facility
- Fully automated production lines
- Clean room environment
- Microbiologically tested

Wipe Manufacturer

- Production capacity of 750,000 packs per day
- 100,000m2 production facility
- Fully automated production lines
- Clean room environment
- Large and small format production
- Microbiologically tested
- Biodegradable material options

Healgen Covid-19 Antigen Test

The Coronavirus Ag Rapid Test Cassette (Swab) is an in vitro immunochromatographic assay for the qualitative detection of nucleocapsid protein antigen from SARS-CoV-2 in direct nasopharyngeal (NP) swab specimens directly from individuals who are suspected of COVID-19 within the first ten days of symptom onset. This swab test is intended for the rapid detection of COVID-19 - results available within 15 minutes with high accuracy.

The Healgen Covid-19 Antigen Test is one of only three UK Government approved Rapid Antigen Test. It is in high demand from schools, councils and companies.

This test is being rolled out by the UK government to mass test the population in Liverpool and other cities, [click here](#) for UK Government approval (test 3 on the list).

- It is intended to aid in the rapid diagnosis of SARS-CoV-2 infections.
- The Healgen Covid-19 Antigen Test (Swab) does not differentiate between SARS-CoV and SARS-CoV-2.
- Each kit contains everything required to carry out the tests, no additional equipment is needed.
- Stage 3 approved by Public Health England & validated by the UK government.
- Results in 15 minutes.
- Each kit includes clear instructions and is easy to use.

Clinical Evaluation:

- Positive Percent Agreement (PPA): 97.3%
- Negative Percent Agreement (NPA): 99.6%
- Overall Percent Agreement (OPA): 98.9%
- Specimen: Nasopharyngeal (NP) Swab
- Time to Results: 15 minutes
- Shelf Life: usually 24 months from the date of manufacture

Benefits:

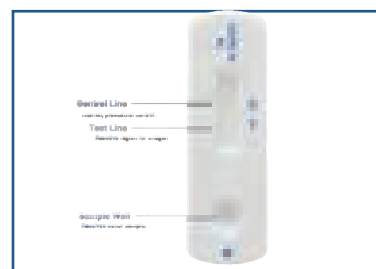

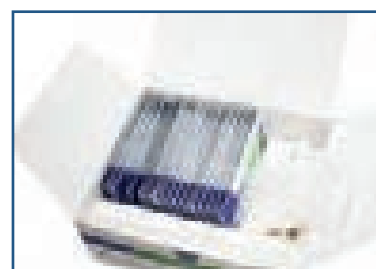

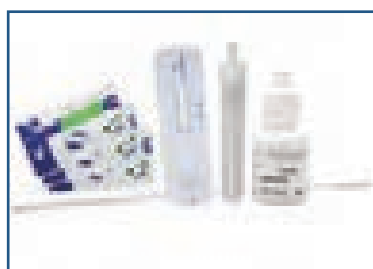

- Rapid testing for SARS-CoV-2 antigen within 15 minutes
- Facilitates patient treatment decisions quickly
- Simple, time-saving procedure
- All necessary reagents provided & no equipment needed
- High sensitivity and specificity

EACH KIT CONTAINS:

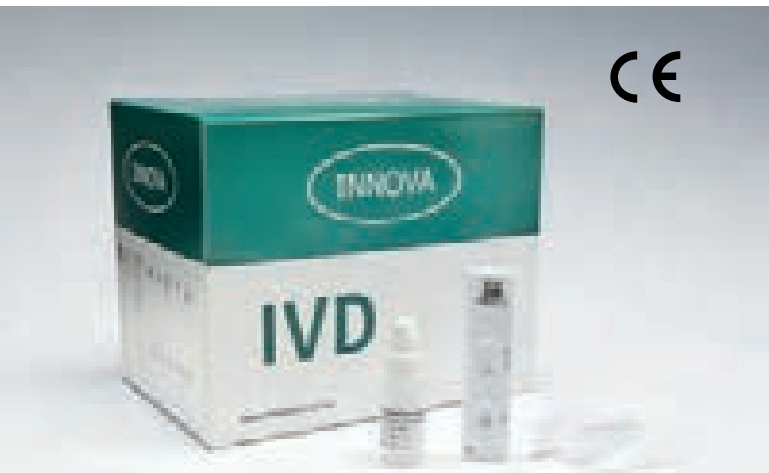

- 20 Test cassettes
- 20 Sterile swabs
- 20 Extraction tubes & dropper tip
- 1 Workstation
- 2 Buffers
- 1 Package insert

POA

20 tests per box - 1000 tests per carton

Click here for a full instructional video on how to use the test kits

The Innova SARS-CoV-2 COVID Lateral Flow Rapid Antigen test kit facilitates the detection of COVID-19 with rapid return of results. This is the rapid antigen test used by the government broadly for rapid mass testing of NHS staff, Carehomes, Schools and other key workers. An application for exceptional use of a COVID-19 rapid test, to be used by members of the public for home use, was approved on the 23rd December 2020 by the Medicines and Healthcare products Regulatory Agency (MHRA).

The INNOVA SARS-CoV-2 Rapid Antigen Test is one of only three UK Government approved Rapid Antigen Test. It is in high demand from schools, councils and companies.

This test is being rolled out by the UK government to mass test the population in Liverpool and other cities, [click here for UK Government approval \(test 2 on the list\)](#).

- **Qualitative, visually read results in 20 minutes**
- **The sample can be collected from the nasal cavities and/or the throat**
- **Each test cassette is individually labelled with a QR Code and an ID number to report the test on to the government website**
- **No instrument required**
- **Room temperature storage or refrigerated (2-30°C / 36-86°F)**
- **Procedural internal control included**
- **Sterile Swabs, Extraction Buffer and Extraction Tubes included**
- **Dispose of used test components according to the instruction leaflet**

INNOVA SARS-CoV-2 Rapid Antigen Test characteristics

- **Assay format: Lateral flow test / immunochromatographic**
- **Instrument: No**
- **Testing time: 20-30 minutes**
- **Specificity: 100%**
- **Overall Accuracy: 98.98%**
- **Antigen: N**
- **Sample material: Nasal and/or throat swab**
- **A commercialised molecular assay was used as the reference method.**
- **The results show that the Innova Covid-19 Antigen Test (Swab) has a high overall relative accuracy.**

EACH KIT CONTAINS:

- 20 Test cassettes
- 20 Sterile swabs
- 20 Extraction tubes & dropper tip
- 2 Buffers

EN455 Medical Examination Glove

The disposable nitrile gloves is intended to be worn on the hands of health care and similar personnel to prevent contamination between health care personnel and the patient's body. This is a single-use, powder-free, non-sterile device.

Certification:

- EN 455 Compliant

- **Nitrile provides better elasticity, better puncture resistance, better abrasion resistance and reduces the likelihood of an allergic reaction.**
- **Comfortable fit with textured fingertips for excellent tactile sensitivity.**
- **Extraordinary strength, stretchable durability and puncture resistance with premium blue colour.**
- **Rolled cuff for easy opening, quick donning, and fast removal. A convenient dispense pack keeps gloves clean and organized while providing easy access.**
- **Enhanced Construction - Our disposable exam gloves come in a blue colour and feature a smooth exterior finish with a beaded cuff for extra durability.**
- **Tactile Precision-The textured finger tips allow for fine control when precision is needed for lab work, medical procedures and more.**
- **Powder-Free-Combined with the Nitrile Construction, our gloves are simply the safest choice against allergic reactions or sensitive skin types.**

EN374 1 & 5 Nitrile Gloves

Manufactured from Nitrile, 4 times the puncture resistance of latex gloves and is manufactured to a watertight AQL of 0.65 for 'pinholes' which ensures a lower instance of tearing and product failure. Produced with a rolled (beaded) cuff which reinforces the cuff area to prevent tearing when putting the glove and also allows for a secure fit to garments, helping prevent liquid entering the wrist area of the glove.

In addition these gloves have been tested to as part of their EU PPE Class III certification. The test are carried out in accordance with EN374 Part 1 & 5.

Certification:

- CE 0362 CAT III
- EN 455-1,2
- EN ISO 374-1:2016 +A1 2018
- EN ISO 374-5:2016

Personal Protective Equipment of Complex Design Category III, in compliance with regulation(EU)2016/425, type C tested to EN ISO 21420:2020,EN ISO 374-1:2016+A1 2018, EN ISO 374-2:2019,EN ISO 374-4:2019 EN ISO 374-5:2016 comply as Medical Device Class I.

POA

MOQ 1 case of 10 boxes

- **Masks are manufactured from 3-ply, spun-bonded polypropylene, non-woven fabric**
- **Integral plastic-coated strip above the nose for optimum fit**
- **Light-weight and comfortable**
- **The elasticated loops are latex-free to minimise allergic reactions**
- **Disposable face masks should be used once and then thrown in the bin**
- **You should also dispose of and replace your mask when they become moist**

Fitting Instructions

- Clean your hands with soap and water or hand sanitiser before touching the mask
- Remove a mask from the box and make sure there are no obvious tears or holes in either side of the mask
- The side of the mask that has the stiff strip should be placed at the top, across your nose
- The coloured side of the mask should face away from you
- Place a loop around each ear to secure
- Mold or pinch the stiff edge to the shape of your nose
- Pull the bottom of the mask over your mouth and chin

Civilian Disposable Face Mask

3 Ply Non-Woven Disposable Face Masks are quality non-woven face masks that are intended to cover the nose and mouth in order to minimise the incidence of cross-infection in clean or sensitive environments.

When someone talks, coughs or sneezes they can release tiny drops into the air that can infect other people. If the infected person wears a facemask, it can reduce the number of germs that the wearer releases, which can protect other people from becoming sick. Disposable masks can be used to help prevent harmful airborne substances from entering the body through the nose and mouth and also to prevent pathogens and germs being spread by the wearer. This can be required in a number of circumstances including:

Main usage includes:

- To help protect from germs and infection
- Personal use to help prevent the spread of infection from yourself and for protection from other people's germs
- To help prevent cross-infection

Figures:

- 98.4% Filtration Efficiency

BiSure PROFESSIONAL

Ozone Spray Bottle Pro

The 2nd generation handheld rechargeable Professional Ozone Spray Bottle (OSB Pro) applies revolutionary electrolysis technology that can convert your regular tap water into an anti-bacterial sanitizing water. This revolutionary technology can help replace conventional chemical surface sanitizers. Simply fill the bottle with clean tap water, press the button, and the device will instantly convert ordinary water into ozonated water.

Adding only water and with the press of one button. Ideal alternative to other chemical sanitizers.

Small Size, High Performance

Ozonated water is well-known for its fast and powerful sanitation performance. This ozone sprayer offers an effective, safe, and environmentally friendly surface sanitation for many commercial hygiene applications.

- **99.99% Third-party measured sanitize rate**
- **5 seconds achieve 99.99% sanitize rate**
- **ZERO chemical residues**
- **3000 times sanitizes faster than chlorine**
- **25 minutes maintains the concentration of ozone water time**
- **12000 times service life**

Features:

- Only needs water and electricity, no additional costs
- It does not change the water pH
- USB-C charging plug and play
- Two-stage mode to meet various applications
- Strong and sturdy metal body

Focus Points:

- For Catering: hotels, restaurants, coffee shops, bars
- For Health Care: hospitals, nurseries, clinics, nursing homes
- For Public Places: gyms, workplaces, schools, leisure
