

Dr. Adams[®]

— Laboratories —

Licensed Distributor of CE home
approved Branded Antigen Rapid Tests

Dr. Adams is the sister company to a Hong Kong Public listed Pharmaceutical company, Sanai Health Industry Group Company Limited (HK Stock 1889). The company was established to deliver analytical services and innovative instruments for pharmaceutical and biological laboratory sectors.

Our products diversify across four categories;

- Chemical analytical services
- Compliance audit services
- Distribution of Bio-Analytical Instruments
- Safety Protective Equipment

We hold exclusive distribution rights for;

- Bio-analytical instruments
- Speedybreedy
- Seasure
- Shepherds

Since the start of the pandemic we have assisted the UK health sector and local authorities with their sourcing activities and helped clients optimise their supply chain for Covid-19 related products.

We are an approved supplier to the DHSC as well as council authorities and many other reputable clients.

Supply Chain

We have developed long term strategic partnerships at manufacturer level and negotiated terms to ensure we deliver the lowest possible cost to serve model whilst securing improved production times. In addition we have market leading logistics partners to further reduce lead times.

We are the licensed distributor for **Easy Diagnosis COVID-19 (SARS-CoV-2) Antigen Test Kit** one of the market leading and UK Government, PHE Porton Down, CTDA, CE home approved antigen rapid tests.

The manufacturer of the Easy Diagnosis LFT has taken part in the PHE Porton Down and University of Oxford SARS-CoV-2 lateral flow antigen test validation process and has passed phase 3a validation.

The Easy Diagnosis LFT is approved for public use under the PROTOCOL in accordance with regulation 39A (2) and (3) of the Medical Devices Regulations 2002.

The Easy Diagnosis LFT is approved to be used for travel and Covid pass verification.

What is the shelf life?
2 years

What certifications does the test have?
Easy Diagnosis LFT has full certification and can be sent on request.

How is the test administered?
Easy Diagnosis LFT enters the lower nostril, therefore, reducing discomfort without compromising on accuracy. The test only requires a 1-2cm swab unlike the standard 9-10cm swab into the nostril. Please scan the QR code to an instructional video on each product page.

What is the lead time for products?
We can provide On the Ground (OTG) stock next day to mainland UK either via our logistics partner or clients may organise their own collection from our warehouse.
For large volumes the lead time is 12 days for pre-order stock. *may be subject to change.

Can you offer FOB (Free on Board)?
Yes, we have the ability to offer FOB stock on a MOQ of 500k subject to signing an agreement and NCNDA.

Do you deliver Internationally?
Easy Diagnosis LFT is approved for European use and can be flown direct into a country of your choice providing there is a license to sell the product in the given country. Please speak to our team before ordering for an International country.

How much stock can you produce?
The factory has the capability to produce 90 million units per month. Our close partnership with the factory ensures Dr Adams stock has a primary slot on the production line, this means our clients will receive orders much faster than the competition.

Does the Easy Diagnosis LFT pick up new variants?
So far, the Easy product has detected the variants – most recently it has picked up the Delta and Omicron variants. This test also picks up asymptomatic cases. *Dr Adams cannot guarantee this test will pick up every future variant.

Do you supply the test kits individually packed?

Tests are available in single packaging or in boxes of 5 to meet your requirements.

How can I trust this test, who uses it?
Absolutely – this test has the highest UK Government accreditations, PHE approved, ISO certified, CTDA, MRHA & CE home approved. Ultimate safety is paramount for all clients.

Can I use them at home?
Yes, the Easy Diagnosis LFT are easy to use and are approved for public use under the PROTOCOL in accordance with regulation 39A (2) and (3) of the Medical Devices Regulations 2002.

How accurate is the test kit?
Easy Diagnosis LFT are the highest accuracy test with Specificity: 100%.

Why is Easy Diagnosis more competitive than other leading brands?
Dr Adams have worked collaboratively with their supply chain to deliver a market leading test for the lowest cost to serve possible. Our margins are lower than our competitors because one of our core values is to deliver high quality services at the lowest possible costs for our clients.

Can this test be used for travel?
Easy Diagnosis LFT can be used for fit2fly (fit2travel), Pre-departure and Day 2 tests in countries that accept lateral flow tests for this purpose.

Why not just provide the Government free tests to staff?
Government free tests are no longer available for the majority of businesses (aside some critical services). Government free tests are not allowed for travel.

What is the MOQ and price point?
Dr Adams are a direct importer so high volume business is our key service however we also have stock on the ground in the UK to assist with the smaller and urgent requests.

Please contact us to discuss your requirements and we can provide you with the best options to suit your needs.
